Technical Assessors and Experts
AC-472 Inspection Programs for Manufacturers of Metal Building Systems
&
AC-172 Fabricator Inspection Programs for Structural Steel

Technical Assessors and Experts are being sought, on a contract basis, with specific knowledge in Metal Building Fabrication & Design including Codes & Standards relevant to International Accreditation Service, Inc. AC-472 Inspection Programs for Manufacturers of Metal Building Systems and AC-172, Fabricator Inspection Programs for Structural Steel.

General
An assessor of QC programs at metal building and structural steel fabricators shall have an in depth knowledge with the industry fabricating shops. This includes operational familiarity of the type of equipment in a typical shop and how it is used. The assessor must have knowledge of the culture of people working in such facilities. Also, the assessor must be familiar with the various products (bar, plate, sheet, wide-flange, channel, etc.) that he/she will see in any shop. Additionally, the assessor must understand material types and grades and how cold working processes may affect the tensile properties of the required steel used in production, be able to determine if the design of metal building is in compliance with the required building code and contract documents.

Technical Requirements
The candidate must have knowledge of contract requirements, inspection techniques and fabrication procedures that, in part, include Welding Processes (submerged arc welding, gas metal arc welding, flux cored arc welding, gas tungsten arc welding) and Steel Fabrication and inspection procedures. Understanding of the California Building Code and requirements for the City of Los Angeles will have priority status.

Management System Requirements
The candidate must have knowledge of Auditing Procedures that include knowledge of IAS policies and processes. An assessor applicant who has auditing or inspection background is required and will be given additional training to conduct the assessments in accordance with IAS AC472 or AC172 requirements. The trained assessor will be evaluated on, knowledge of assessment process, preparation and organization skills, oral communication techniques, Information collection skills, efficiency and effective use of time, leadership, tenacity and firmness and objectivity and judgment.

Travel and compensation details will be discussed when the assessor credentials have been demonstrated. Upon meeting the above requirements, the assessor must be willing to travel approximately 120 days per year
