May 4, 2008 (Editorially revised August 1, 2011)

Notes:

1. The fees noted above include the cost of administrative management of the program, quality document review and the associated costs of IAS performing the assessment, i.e., staff and travel time, airfare, lodging, rental car, meals and other related costs.
2. The \$1250 (for Initial and for 1-year renewals) and \$2500 (for 2-year renewals) charge that is added in certain categories is for the additional time and cost to conduct Part B and/or Part C assessment, in conjunction with the Part A assessment.
3. IAS will assess a fee of \$2850 from the applicant, when IAS has to conduct an out-of-sequence on-site assessment to review any of the fabricators “for cause” (such as written complaint investigation, fabricator location move, significant change in quality system and key personnel, changes to scope, including component facility change or addition, Part C facility addition, etc.).
4. The costs associated with the two inspections per annum to be conducted by the accredited inspection agency selected by each of the manufacturers at each location must be based on a mutual arrangement between the inspection agency and the manufacturer. Costs associated with the inspections conducted by the accredited inspection agency area not covered under the schedule.
5. These fees only apply to facilities located within North America.
6. If a scheduled assessment is cancelled for reasons beyond IAS’s control, additional costs associated with rescheduling the visit will apply, i.e., staff and travel time, airfare, lodging, rental car, meals and other related costs.
7. If a follow-up visit is needed to resolve and close out Corrective Action Requests (CARs) resulting from an earlier assessment of an applicant facility, an additional fee of \$2850 will apply.
