FORMALDEHYDE EMISSIONS FOR WOOD PRODUCTS
CERTIFICATION UNDER CALIFORNIA AIR RESOURCES BOARD (ARB)
- ANSI AND ANSI/HPVA STANDARDS

Note: The product certification used most closely resembles a product certification scheme type 5 as described in ISO/IEC 17067 (2013), Conformity assessment — Fundamentals of product certification and guidelines for product certification schemes.
Scheme type 5

The surveillance part of this scheme allows for the choice between periodically taking samples of the product either from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process, or audit of the management system, or both. The extent to which the four surveillance activities are conducted may be varied for a given situation, as defined in the scheme. If the surveillance includes audit of the management system, an initial audit of the management system will be needed.

**“Codes” encompasses Model Codes, including the International family of codes published by International Code Council and the National Building Code of Canada, and state and local codes that have amended the Model Codes.**
