Generators
Panel Boards
Power Supplies
Pumps & Motor Operated Appliances
Safety Transformers
Transfer Switch Equipment

INDUSTRIAL & SPECIALTY EQUIPMENT

Control Panels
Energy Management Equipment and
Accessories
Hazardous Location Equipment
Industrial Control Equipment
Lifts and Elevating Equipment
Machine Tools And Equipment
Medical & Diagnostic Devices

Note: The product certification used most closely resembles a product certification scheme type 3 as described in ISO/IEC 17067 (2013), Conformity assessment — Fundamentals of product certification and guidelines for product certification schemes.

Scheme type 3

The surveillance part of this scheme involves periodically taking samples of the product from the point of production and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process. This scheme does not provide any indication of the impact the distribution channel plays on conformity. When serious nonconformities are found, the opportunity may exist to resolve them before widespread market distribution occurs.
