BUILDING COMPONENTS	The VMC Group
<ul style="list-style-type: none">Nonstructural building components and their mounting configurations which are subject to wind and seismic loads	<p>The VMC Group Certification Scheme for Product Certification of Nonstructural Components</p> <p>The VMC Group Approval Standard for Wind Resistant Certification of Nonstructural Building Components (VMA 1825)</p> <p>The VMC Group Approval Standard for Special Seismic Certification (VMA 1826)</p> <p>Scheme Type 5</p>

Notes:

The product certification used most closely resembles a product certification scheme type as described in ISO/IEC 17067 (2013), Conformity assessment — Fundamentals of product certification and guidelines for product certification scheme:

Type 5: *The surveillance part of this scheme allows for the choice between periodically taking samples of the product either from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfill the specified requirements. The surveillance includes periodic assessment of the production process, or audit of the management system, or both. The extent to which the four surveillance activities are conducted may be varied for a given situation, as defined in the scheme. If the surveillance includes audit of the management system, an initial audit of the management system will be needed.*
