### CATEGORIES of CERTIFICATION

#### Training Modules

Course developing process

#### Scheme Criteria

The training course material (module) evaluation process is based on PECB Training Certification Program: Requirements and guidance for use (05100-S01-PTCP).

#### Scheme type 1a

In this scheme, one or more samples of the product are subjected to the determination activities. A certificate of conformity or other statement of conformity is issued for the product type, the characteristics of which are detailed in the certificate or a document referred to in the certificate. Subsequent production items are not covered by the certification body's attestation of conformity.

The samples are representative of subsequent production items which could be referred to by the manufacturer as being manufactured in accordance with the certified type.

The certification body may grant to the manufacturer the right to use the type certificate or other statement of conformity (e.g. letter) as a basis for the manufacturer to declare that subsequent production items conform to the specified requirements.
