| Effective Date of Scope: | February 14, 2020 |
| Accreditation Standard: | ISO/IEC 17065:2012 |

CATEGORIES of CERTIFICATION

Training Modules
Course developing process

Scheme Criteria
The training course material (module) evaluation process is based on PECB MS Training Certification Program: Requirements and guidance for use (06300-S1-PTCP)

Scheme type 6

This scheme is mainly applicable to certification of services and processes.

Although services are considered as being generally intangible, the determination activities are not limited to the evaluation of intangible elements (e.g. effectiveness of an organization's procedures, delays and responsiveness of the management). In some situations, the tangible elements of a service can support the evidence of conformity indicated by the assessment of processes, resources and controls involved. For example, inspection of the cleanliness of vehicles for the quality of public transportation.

As far as processes are concerned, the situation is very similar. For example, the determination activities for welding processes can include testing and inspection of samples of the resultant welds, if applicable.

For both services and processes, the surveillance part of this scheme should include periodic audits of the management system and periodic assessment of the service or process.
