

ISO 15189 for Clinical/Medical Laboratories Training

Coming to New Delhi, India | April 29-30, 2019

Training for clinical/medical laboratories on ISO 15189.

This course is designed to train and motivate clinical laboratory staff to participate in the processes that support their production of technically competent laboratory results.

This 2-day Training Course examines ISO 15189 and the principles and techniques used to implement its requirements, and meet international accreditation requirements. It also facilitates the practice of clinical laboratory QA and QC skills. It is based on internationally-recognized approaches to clinical laboratory testing. The techniques learned by participants promote the involvement of all types of clinical laboratory staff. The course includes easy-to-implement methods for risk-based thinking, continual improvement, and create conditions that support more consistent and desirable levels of patient care provided by a competent laboratory.

Course Objectives

Upon successful completion of the course, participants will have gained knowledge about the following key areas:

- Internal Audits & Management Reviews
- Clinical Testing Criteria
- Complaint Handling Processes
- Corrective Actions and Preventative Actions
- Training

- Confidence Region for Clinical Results
- Traceability of Measurement

Who Should Attend?

- Pathologists,
- Clinical Microbiologists,
- Clinical Biochemists and Technicians
- Those working in Medical labs with a need to understand ISO 15189
- Consultants
