Note: The above scope of accreditation is based on the statistical nomenclature for economic activities NACE rev. 2 and as recommended by the current version of IAF ID 1.

The scope of accreditation represents broad classifications granted by IAS on the basis of the management system certification processes demonstrated by the certification body (CB). Accreditation is based on the competence and ability to effectively apply the requirements of the relevant certification standards listed in the CB's scope of accreditation. IAS accreditation entails review of the CBs own management system, on-site assessment of the CB's certification processes, review of CB's access to expertise including onsite observation of the CB when conducting certification audits at client sites. Under the conditions of accreditation, the CB is obligated to use equivalent certification practices covering the specific scopes as listed for all clients and as demonstrated during the accreditation process. Accreditation does not cover certification in areas outside the scope of this accreditation certificate. Accreditation does not imply endorsement of the products or the design or performance characteristics of products certified by the CB.

As noted above, this CB operates virtually from the location mentioned on page one of the accreditation certificate. The activities performed virtually are as follows: Certification Decision Making , Technical Review of Audit Records, Application Review, Assignment of Audit Teams ,Determination of Audit Time and Audit Duration, Creation and Maintenance of Audit Programmes, Management of Certification Body Competence, Management of Appeals, Management of Complaints, Administration of Management System.
